

To Whom it may concern

29<sup>th</sup> July 2013

Dear Sirs,

**Reference for Carenza Developments Ltd.**

I have been asked to provide this reference for Carenza Developments Ltd which I am only too pleased to do.

I have worked with Lui and his team for many years and have consulted in a design and build capacity also. We have worked together on many schemes ranging from commercial, industrial, equestrian and residential and I have always been impressed by the standard of workmanship, professional attitude and ability to work under pressure. Their expertise is in the local area, and their knowledge of the vernacular materials and techniques as well as connections with local suppliers and tradesmen gives them a distinct advantage.

The range of projects which we have worked on together have been very varied in scope, size and overall contract sum and the ability to cope with the larger projects as well as care about the smaller commissions is what sets Carenza Developments apart. We have worked on large commercial projects and significant leisure refurbishments which have involved all aspects of the contractors skills and they have been handled with ease.

It is for the above qualities that I would have no hesitation in recommending Carenza Developments for construction projects large or small.

Please feel free to contact me should you require further testament or information.

Yours Sincerely

*S Bond*
